the performance of tests on over-hedging, the disappearance of hedged items, efficiency and the external reversal of hedging transactions entered into with internal Société Général Group counterparties.

As at December 31, 2022, the amount of hedged portfolio remeasurement differences was  $M \in (2,262)$  in assets and  $M \in (9,659)$  in liabilities. The fair value of the corresponding financial instruments is included under "Hedging derivative instruments" in assets and liabilities.

Given the documentation requirements for "macro-hedging" relationships, the volume of hedging derivative transactions and the use of Management judgment required, we consider the accounting treatment of portfolio-based interest rate risk fair value hedging of outstandings of the retail banking networks in France to be a key audit matter.

## **Our response**

Our audit procedures in response to the risk relating to the accounting treatment of portfolio-based interest rate risk fair value hedging of outstandings ("macro-hedging") consisted in obtaining an understanding of the procedures used to manage the structural interest rate risk, and reviewing the control environment set up by Management in particular for the documentation, identification and eligibility of hedged and hedging items, as well as for the performance of effectiveness tests.

With the support of financial modelling experts, where necessary, our work mainly consisted in:

- familiarizing ourselves with the accounting documentation of the hedging relationships;
- testing the eligibility of the financial assets and liabilities used by the Société Générale Group for the portfolio-based interest rate risk fair value hedge accounting, according to the terms and conditions defined by IAS 39 as adopted in the European Union;
- assessing the procedures used to prepare and control the criteria adopted to schedule the maturities of the hedged financial instruments, particularly with regard to the adopted maturities of the eligible financial liabilities;
- assessing the procedures used to determine the effectiveness of these hedging relationships, as well as the related governance;
- analyzing the market reversal system for hedges entered into with internal Société Générale Group counterparties and the related documentation, and conducting tests on the matching of internal and external transactions;
- analyzing the results of tests on over-hedging, the disappearance of hedged items, efficiency and reversal required by applicable accounting standards.

We assessed the information disclosed in Notes 1.5 "Use of estimates and judgment", 3.2 "Derivative financial instruments" and 3.4 "Fair value of financial instruments measured at fair value" and 10.5 "Structural interest rate and currency risks" to the consolidated financial statements and their compliance with IFRS 7 "Financial instruments: Disclosures" with regard to hedge accounting.

## MEASUREMENT OF GOODWILL

## **Risk identified**

The accounting recognition of external growth transactions leads the Société Générale Group to record goodwill in the asset side of the consolidated balance sheet. This goodwill represents the difference

between the acquisition cost of the activities or securities of companies acquired and the share of identifiable net assets acquired and liabilities assumed at the acquisition date. As at December 31, 2022, the net value of goodwill amounted to  $M \in 3,781$ .

The Société Générale Group must determine the presence or absence of indications of loss in value on this goodwill. The comparison of the net carrying amount of uniform business groupings, divided into CGUs, and their recoverable amount is a key component in assessing the potential need to record an impairment. The value in use of CGUs was calculated using the discounted cash flow method based on distributable profits calculated at CGU level.

As disclosed in Notes 1.5 "Use of estimates and judgment" and 2.2 "Goodwill" to the consolidated financial statements, the models and data used to value these CGUs are based on accounting estimates resulting from the exercise of Management judgment, notably concerning the following assumptions:

- future distributable profits of activities or companies acquired, whether five-year budget forecasts or the extrapolation for an additional year to calculate the terminal value;
- discount and growth rates applied to forecast flows.

For this reason, we considered the measurement of goodwill to be a key audit matter.

## **Our response**

Our audit approach is based on obtaining an understanding of control procedures relating to (i) goodwill impairment tests and (ii) the preparation of business plans, implemented within the Société Générale Group to assess future changes in structures and activities, and to identify indications of impairment loss on these assets.

Procedures on the financial statements for the year ended December 31, 2022, conducted with our valuation specialists, notably consisted in:

- assessing the way groupings of uniform businesses are determined and, where appropriate, change;
- analyzing the methodology applied in the current context;
- comparing prior year profit forecasts with actual results for the relevant years, to assess the reliability of the budget process;
- conducting a critical review of business plans prepared by Management and approved by the Board of Directors based on our knowledge of activities, and of the assumptions adopted by Management beyond the five-year period to establish projections enabling the determination of terminal values;
- conducting a critical analysis of the main assumptions and parameters used (growth rate, cost of capital, discount rate) with regard to available internal and external information (macro-economic scenarios, financial analysts' consensus, etc.);
- independently recalculating the valuation of the CGUs;
- assessing the sensitivity analyses of results to change in key parameters, in particular when the recoverable amount is close to the net carrying amount.

We also reviewed the information submitted by the Société Générale Group on goodwill, disclosed in Notes 1.5 "Use of estimates and judgment" and 2.2 "Goodwill" to the consolidated financial statements.
